ROMAN HYACINTHS

For early Winter blooming, Roman Hyacinths will give the greatest satisfaction. Exquisitely fragrant, the flower spikes are lovely and graceful in the extreme. The bulbs can be grown in soil, water or pebbles, and are sure to bloom. When grown in pots they should be well watered after potting, then placed in a dry, cool place, such as a cellar, and not brought out until the roots have made a good growth. In water or pebbles, treat the same as Chinese Sacred Lily. We offer the finest grown bulbs at low prices. Hardy in the ground south of Washington, D. C.

Single White—Elegant, fragrant, waxy-white flowers, of surprising beauty.

Single Blue—Extremely pretty, and in novel contrast with all other varieties.

Single Pink—Fine flowers of a beautiful blush pink color.

Price, 5c each; twelve for 50c.

FEATHERED, or COCKADE HYACINTHS

A real curiosity. First, a frizzled cockade-like spike an inch or two in length, appears above the soil, and as it slowly rises on its long stalk it becomes five or six times as long as at first, developing into a long, feathery blue plume, and lasting for weeks in that condition. One of those pretty, odd things that everybody likes. Perfectly hardy in the garden and fine for pots. **Price, 3c each; 25c per dozen.**

Feathered Hyacinth.

GRAPE HYACINTHS

Grape Hyacinth (Hyacinthus Botryoldes.)

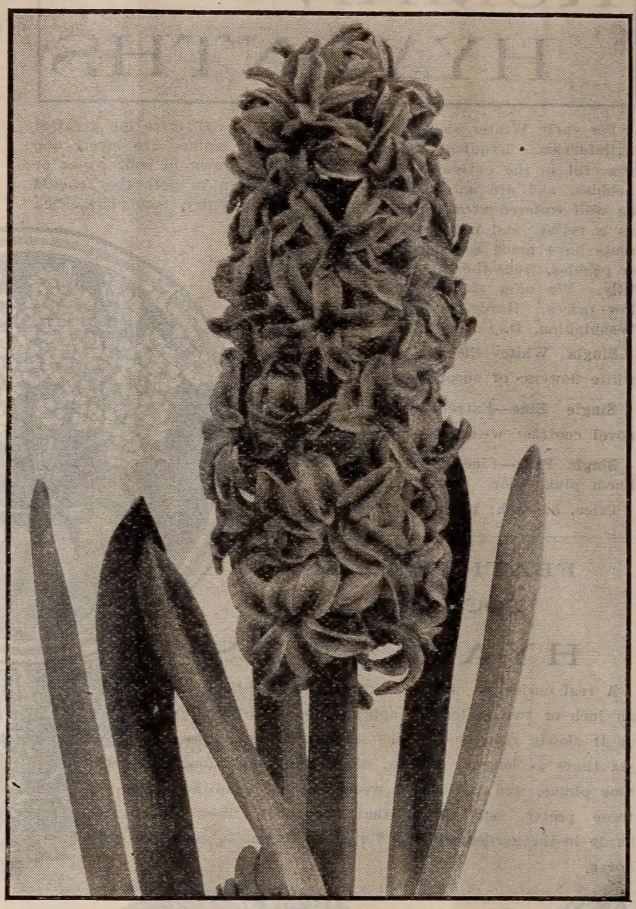
One of the sweetest little flowers imaginable, and in masses very striking, making a wave of intensest blue that catches every eye. As hardy as an oak and increases rapidly. Ours is an improved variety with longer spikes and larger bells than the old-fashioned variety. Its spikes are just the size for button-hole bouquets, while its long stem enables it to be used to advantage in all bouquets or cut flower work. We offer them in white and blue. **Price, two for 5c; 25c per dozen.**

If goods are to go by express, choose 30c worth extra for each dollar you send us. Fruit and 50c collections excepted.

HYACINTHS

Large, Selected, Perfect Bulbs of Finest Quality

For Winter and early Spring flowering nothing surpasses the Hyacinth. It is sure to bloom and give satisfaction in the house during Winter, or in the garden in early Spring. Its large spikes resemble nothing else in cultivation. Rather than offer a long, confusing list of varieties, we have carefully selected 12 each of Singles and Doubles, embracing all the shades of this beautiful flower, each one being the largest, strongest and best of its color.



Single Hyacinth.

12 Best Named Single Hyacinths

Price 10c each; any 6 for 50c, or the full set of 12 for $1.00

All Single Hyacinths succeed well in glasses and when forced.

We consider the Single Hyacinths more useful and valuable than the double varieties. They are better for forcing, more vigorous in growth, and produce stronger spikes of bloom, which are generally of better substance and are at least as beautiful as those of the double sorts.

The exact shades cannot be given, but the general outline of colors are kept separate, so that in ordering you know what color you are buying.

CROCUS THE FIRST FLOWERS OF SPRING

Among the earliest to blossom in Spring is this beautiful flower, lifting its head almost before the snow has disappeared. Blooming at a time when the ground is destitute of foliage and flower, it is a welcome visitor. A good place is any place—in groups, in figures, in lines at the edge of walks, etc. With a trowel or spade make a slanting opening about two inches deep, put in the bulb, then with the foot press back the sod. This is an easy way to plant flowers that will be a sheet of bloom almost before the grass is green. They will care for themselves, blooming very early amid the grass and dying down to the bulb in ample time to be entirely out of the way of the lawn mower. If planted in beds cover bulbs about two inches. Crocus can be readily bloomed in pots or boxes, requiring no special culture. Few flowers will give so much pleasure and delight for the little care and expense called for.

Chinese Sacred Lily

Oriental Narcissus, or "Joss Flower."

The most satisfactory of all Winter-blooming bulbs. No home should be without one. Nothing is easier cared for or gives as great an abundance of deliciously scented bloom. It is grown by the Chinese to herald the coming of their New Year, and as a symbol of good luck. While the bulb can be grown in a pot, the most novel and beautiful way is to grow it in a shallow bowl of water with enough pebbles to prevent it from toppling over when the immense spikes of flowers are developed. Keep in a moderately cool place. The short time required to bring the bulbs into full bloom—four to six weeks after planting—and the fact that it can be grown everywhere and by everybody, is certain to secure a permanent popularity for the "Sacred Lily." Our bulbs will not arrive from China until October 1st, but orders will be booked for them. **Price, extra sized bulbs, 15c each; two for 25c.**

Golden Sacred Lily

Narcissus Campernelle Regulosus.

The flowers of this beautiful Sacred Lily are almost identical with the Chinese variety, except that they are of the most lovely shade of deep golden-yellow, making a fine contrast with the white bloom of that noted kind. The bulbs are not nearly so large, but the trusses of flowers are of good size. **Price, 5c each; six for 25c.**

LILIUM AURATUM

The Golden-Rayed Lily—This grand Summer flowering sort is now considered the Queen of Lilies. It produces its handsome, richly-colored flowers in large clusters, as shown in the engraving, and blooms profusely from June to October. When expanded, the flowers measure from 8 to 10 inches in diameter and are composed of six pure white petals, each of which is distinctively striped the whole length with a clear yellow golden band and thickly studded with rich crimson spots. Gracefully formed, deliciously fragrant. Large, sound bulbs, imported direct from Japan. **Price, 20c each; three for 50c.**

SPECIOSUM MONSTROSUM ALBUM

Among the showiest of all Lilies and perhaps the most robust and the most radiantly beautiful. Very fragrant and hardy, with broad, flat stems and immense heads of flowers, often fifty flowers in a cluster. No garden complete without some of them. **Price, 20c each; three for 50c.**

LILY SPECIOSUM RUBRUM

This is one of the most popular and satisfactory of all Lilies and is considered by many as the finest of all Lilies. The flowers are bright crimson and white spotted. Splendid large flowers borne in clusters, stem two or three feet. **Price, 20c each; three for 50c.**

TIGRINUM, Fl. Pl.—DOUBLE TIGER LILY

This magnificent Lily is borne in immense clusters on tall stems; the flowers are very large, frequently six inches across, and very double; color deep, fiery red, spotted with black; any illustration gives but a faint idea of the showiness of this superb Lily. **Price, 10c each; six for 50c.**

LILY LONGIFLORUM

(Bermuda grown.) Widely used for forcing for Easter holidays. Its flowers have more substance and last longer in bloom than the Bermuda Lily. Quite hardy and beautiful in the open ground, blooming in June and July. Flowers snow-white and trumpet-shaped; very fragrant. **Price, 15c each; three for 40c.**

True Bermuda Easter Lily—Lilium Harrisi

Pure pearly-white, deliciously fragrant, and a remarkable profusion of bloom characterize this charming and celebrated Easter Lily. Without exception, it is one of the most valuable bulbs for Winter flowering in house. A profusion may be had from Christmas until Spring—with a dozen bulbs or more. Bulbs after flowering can be rested a couple of months by withholding water, and will then produce another crop. It is a magnificent variety for church decoration at Easter. **Price, strong bulbs, 15c each; four for 50c; large size, 25c each; five for $1.00.**

Bermuda Easter Lily.

Snowdrops.

GIANT SNOWDROPS

The Charming Snowdrop is the First of all Flowers to Herald the Approach of Spring

It can frequently be seen in bloom when the ground is white with snow, as it takes every advantage, and hastens to display its graceful snow-white bells before Winter has disappeared. In conjunction with Chionodoxa and Scilla, a matchless effect can be produced. As the bulbs are small, they should be planted liberally in order to obtain immediate results. Banks, grassy slopes, edging, or rock-work will suit all of these bulbs. They should not be disturbed often if a fine display is desired.

Single Snowdrop—Pure white, graceful bells; early flowering. **Price, 2c each; 20c per dozen.**

Double Snowdrop—(Galanthus Nivalis, fl. pl.) Flowers perfectly double, pure white. **Price, 3c each; 25c per dozen.**

Elwes' Giant Snowdrop—(Calanthus Elwesi.) The largest and most beautiful, flowers snow-white, with emerald-green tube. **Price, 3c each; 30c per dozen.**

If goods are to go by express, choose 30c worth extra for each dollar you send us. Fruit and 50c collections excepted.

Very beautiful flowers, the single varieties being most brilliant. They are not quite hardy; planted from October to November, they will bloom in the early Spring, but need covering with litter during Winter for protection. Can also be had in bloom in April in the house by having a few pots in a cool room. Prices include postage.

Anemone, Single—Mixed; brightest colors. **Price, 2c each; 20c per dozen.**

Anemone, Double—Mixed; best assortment of colors. **Price, 3c each; 25c per dozen.**

Chionodoxa Luciliae.

CHIONODOXA LUCILIAE
(GLORY OF THE SNOW.)

We find these bulbs are becoming very popular, and deservedly so, for their lovely blue and white flowers, produced in long sprays, are seen in the garden among the earliest Spring flowers—sometimes even before the snow has disappeared. The bulbs are perfectly hardy and make a fine display when planted in masses outdoors. For window culture they are fully as charming as Freesias. They bloom very early, commonly by Christmas. Selected bulbs. **Price, 3c each; 25c per dozen.**

TRITELIA UNIFLORA

A most valuable addition to Winter flowering bulbs for house culture. Several bulbs can be planted in a four or five-inch pot; each will send up numerous flower stalks, producing exquisite star-shaped blossoms; pure white, beautifully lined with azure-blue. The flowers follow each other successively, and a pot or basket of these bulbs presents a lovely blooming appearance all Winter. This variety is also entirely hardy; can be planted in open ground, blooming in Spring. **Fine bulbs, 3c each; 25c per dozen.**

ALLIUM NEAPOLITANUM

Allium Neapolitanum—Another excellent variety for Winter flowering, now extensively forced by florists for cut flowers, being of pure white with green stamens borne in large, loose umbels. **Height, 15 to 18 inches. Price, 5c each; eight for 25c.**

IRIS

FLOWERING FLAG—FLEUR-DE-LIS.

Hardy Spring and Summer-blooming plants, bearing large, rich and various colored flowers. The tubers or bulbous-rooted kinds do not require a rich soil, but a sandy loam will suit them well. The English and Spanish varieties should be planted out in clumps where they may be seen to advantage. The crown of the bulb must not be more than three inches below the surface. From September to December will answer for planting. No garden should be without them, especially as they are valuable for cutting.

ENGLISH IRIS.

Our collection embraces a full range of color, from a very deep purple to a very pure white. **Price, 3c each; 30c per dozen.**

SPANISH IRIS.

This variety is well adapted for pot culture, blooming in the Winter earlier than the above, but smaller; beautiful shades of violet, yellow, blue and white. **Mixed varieties, 2c each; 20c per dozen.**

Iris—Flowering Flag.

Freeias.

Winter Blooming Freesia

Refracta Alba.

The charming and novel blossoms of this popular flowering bulb are well shown in our illustration. For Winter blooming in the house it is probably today the most popular of all. It is sure to succeed and flower elegantly for any one in any situation. The perfume is delicious. There are six to eight flowers on a stem nine inches high, which are particularly valuable for cutting. Four to six bulbs can be planted in a five-inch pot. They commence growth immediately after planting and need not be put away to form roots like Hyacinths. Planting successively from September to November will give a succession of bloom through the Winter. We cannot too earnestly urge customers to plant this charming Winter flower. Pure white, with yellow-blotched throat; delicious fragrance. **Price, fine bulbs, 3c each; twelve for 25c; mammoth bulbs, 4c each; ten for 25c.**

Scilla Siberica.

Scilla Siberica

The Siberian Scilla, or Squill, has flowers of a lovely ultramarine blue color, borne in graceful spikes; in the house it blooms early, like the Roman Hyacinths, and forms a beautiful contrast with them. In the open ground they are quite hardy, and especially fine planted in small beds or with Snowdrops, and, like them, frequently blooming before the snow has gone. **Price, 2c each; 15c per dozen.**

Ixias and Sparaxis.

Ixias

The graceful flower spikes of the Ixias remind one of Gladiolus; but the flowers are very distinct, being round and well opened. Their brilliant colors and vividly contrasting markings have made them quite popular. For pot culture, plant six in a five-inch pot and treat as Hyacinths. When in full bloom the display will be magnificent. For outdoor culture they should be planted in a somewhat sheltered situation, and protected with leaves or straw.

Mixed Sorts—Many varieties of rich shades and colors. **Price, 3c each; 25c per dozen.**

Sparaxis

Resembles Ixias, but flowers are more drooping, opening flatly. Their combination of beautiful and unusual colors is fascinating. The individual flowers are very large, and the brilliant colors are striped and splashed in every imaginable manner. **Fine mixed, all colors, 3c each; 25c per dozen.**

Ornithogalum Arabicum

(Arabian Star of Bethlehem.)

This is another bulb of comparatively recent introduction. It is one of the most magnificent Winter blooming bulbs or plants; in fact, some consider that it excels all others. The bulb resembles that of a Hyacinth. Treat it just as you would a Hyacinth, not bringing it up to the light too soon, and it will reward you by throwing up a flower spike eighteen inches or even two feet in height, a great mass of pearly-white flowers, having a bright jet-black center. **Price, 5c each; six for 25c.**

Ornithogalum Arabicum.

If goods are to go by express, choose 30c worth extra for each dollar you send us. Fruit and 50c collections excepted.

Ranunculus-Fair Maids of France

For beauty and grace of form, and brightness of colors, the Ranunculus is unsurpassed. These attractive qualities have made it a prime favorite. The Ranunculus requires careful culture, and is worthy of it. The plants should not be exposed to a hot, dry air, nor to a blazing sun. The soil should be rich and not too dry, and yet well drained. **Price, 2c each; 20c per dozen.**

Lily of the Valley.

LILY OF THE VALLEY

One of the most charming of Spring flowering plants, bearing slender stems with tiny bells, deliciously fragrant. They are largely used for forcing in Winter and Spring, and can readily be flowered in the house. The pips or crowns are received each year from Germany during November, and they may be planted any time after their receipt, as long as they can be had in good condition. The simplest method for indoor culture is to place a bundle of 25 pips in a 6 or 7-inch pot, filling it up with sand, moss or light soil, allowing the points of the pips to be about an inch above the surface of the soil. They should then be placed out of doors in a shaded place and allowed to become frozen, or they may be placed in a refrigerator and frozen artificially. While it is not absolutely necessary that they should be subjected to frost, yet it materially helps in their quick flowering. The pots can be brought indoors as wanted, and if frozen should be thawed out slowly, after which they may be put in a shaded place in a temperature of about 70 degrees, and when the spikes are three or four inches high they may be brought to where they are to perfect their flowers. The entire operation from the time of bringing them indoors until in flower does not take over a month. By having a number of pots and bringing in at intervals, a continuous display can be had throughout the Winter and Spring months. Pips we offer below are of the best quality. **Extra select large flowering bulbs, German grown, strictly first-class stock, 3c each; 30c per dozen.**

Note—Lily of the Valley pips (bulbs) do not arrive from the foreign grower until the latter part of November. Orders for them will be held until that time.

Select List of Ever-Blooming Hybrid Tea Roses

PRICE, 10c EACH; ANY SIX FOR 50c. TWO-YEAR-OLD PLANTS, 25c EACH; SIX FOR $1.25.

Owing to limited space in Fall catalogue, we cannot enumerate and describe as many varieties of Roses as we do in Spring. We can, however, furnish all Roses mentioned in our Spring catalogue.

As the demand for Roses during the Autumn months is largely confined to the finer sorts for house culture during the Winter, we therefore devote the following pages to a select list of choice varieties most suitable for the purpose, and that cannot fail to give the most gratifying results. When received the Roses should be planted at once in a three or four-inch pot, in good, rich soil, watered freely and given a warm temperature and as much light and sun as possible. In the Spring they may be transplanted in the open ground, where they will continue to bloom throughout the Summer.

Fall planting of Roses in open ground is only recommended for the Southern and Pacific Coast States, where the Fall and Winter is the most favorable time for all kinds of outdoor planting. The kinds here offered are especially recommended for these localities.

Bessie Brown.

Antoine Rivoire — Large, full, Camellia-shaped flowers. Color rosy-flesh, on a yellow ground, shaded with a border of carmine.

Bessie Brown—The flowers are very large and highly built and double; color is a creamy-white with a beautiful shade of pale, tender flesh, resembling glossy silk. It is highly scented and a most magnificent Rose in the open ground.

Burbank—Perfectly hardy. The flowers are double, of fine form, nearly three inches across. The color is a deep rose pink, shading to a beautiful soft rose at the center.

Beauty of Stapleford—The flowers are very large and perfect in form, deliciously scented. Tea fragrance. The color is a clear, bright red, shading to bright, rosy-crimson.

Champion of the World—Color rich glossy pink, delightfully fragrant, and such a strong, vigorous grower that it is almost invulnerable against attacks of insects.

Clara Watson—The buds are very beautiful and are supported on long stems, making it desirable for cutting. The color is salmon-pink, very difficult to describe.

Empress Augusta Victoria—Elegant large pointed buds and very large, full, double flowers. Color delicate creamy-white; deliciously fragrant.

Gruss an Teplitz—The color is brightest scarlet, shading to deep, rich, velvety-crimson. It is very fragrant. The freest grower and the most profuse of any ever-bloomer.

Helen Cambier—Great yellow Garden Rose. Very free-blooming, flowers of splendid substance and a delightful shade of deep, rich, golden yellow. In extreme heat comes a deep amber color. The buds are full and firm, lasting a long time when cut.

Helen Gould—A better Rose for general purposes, especially Winter blooming, than American Beauty, the dream and hope of every Rose grower. The flowers are full and perfectly double; the buds beautifully made—long and pointed. The color is a warm rosy-crimson. As a Rose for Winter blooming indoors in pots or boxes it is far and away the superior of any variety now known.

Lady Battersea—This variety has long, oval buds, sharply pointed, very striking in form; the color is bright, cherry-crimson, the stems are stiff and extremely long for a red Rose.

Mme. E. Duranthon—Large flowers, surmounting a long, stiff stem; creamy-white outside, center pink and coppery-yellow. Extremely free.

Mad. Jules Grolez—An exceedingly free-blooming variety with very bright, large, full, finely formed flowers. Color a distinct and charming shade of satiny-pink.

Meteor—A rich, dark, velvety-crimson, ever-blooming Rose, as fine in color as the best of perpetuals. The flowers are of good size, very double and perfect in shape.

Pernet's Triumph—The flowers are extra large, having broad, thick petals and long, tapering buds, with delicious tea fragrance. Color a fine, clear magenta-red, sometimes passing to a bright crimson.

Pink La France—No variety can surpass it in delicate coloring—silvery-rose shades, with pink. It has a satin sheen over all its petals; hardy beyond question.

Red La France—Color a rich, deep, even pink throughout. The growth of the plant is vigorous, the habit good, and the flowers, which are thrown up well above the foliage, are produced very freely.

Souvenir de President Carnot—Handsome bronzy-green foliage and large, elegant-shaped buds. The flower is of large size, exquisite shape. Color a delicate rosy flesh, shaded a trifle deeper at center. Very profuse bloomer.

White La France—It is identical with La France, except in color. It is purely white, sometimes tinted with fawn.

SWEET PEAS.

When Sweet Peas are wanted in bloom for Winter or early Spring, they should be planted indoors early in September, and to have the best results the temperature should not exceed 45 degrees at night, to keep them stocky and firm. They should have plenty of air during the day and a full exposure to the sun. Splendid success may be obtained from sowing Sweet Peas in October or November. A perfectly drained soil so situated as not to be subject to too frequent or severe freezing should be selected, and the seed covered about three inches deep. While you cannot be sure of success from Fall sowing, yet it is worth while to take the risk for the advantage of having blooms about a month earlier than you could get them from outdoor sowing made in the Spring.

Our Grand Large-Flowering Mixed Sweet Pea—The finest mixture possible, as only the large-flowered or "Grandiflora" type (Eckford's) is used. More than 100 different colors. They are perfectly magnificent. **Per packet, 3c; ounce, 8c; one-fourth pound, 20c.**

CHOICE and RARE FRUITS

Owing to our condensed catalogue for Fall we can only give a list of varieties we can supply. This list has been selected with the utmost care, including only such varieties as we knew of value to our customers.

FALL PLANTING—Some object to Fall planting. It has been fully demonstrated that there is no better time in the whole year to plant fruit than October, November and December. The trees and plants become established in the ground, the roots callous over, and when Spring comes they commence growth at once. If you are thinking of planting do not fail to order at once.

ALL FRUITS MUST BE SENT BY EXPRESS, unless otherwise stated.

When offered by mail, postage is paid by us; if by express or freight, charges are to be paid by purchaser; but larger stock will be sent.

SPECIAL NOTICE—As our Nursery is a separate and distinct department from our Greenhouses, it is necessary that all Fruit Orders be shipped direct from the Nursery, and we therefore ask customers to kindly keep fruit orders separate from the Plant and Seed Orders. Fruits will not be shipped with other plants.

PRICES ON FRUITS are placed very low and we cannot allow them to be included in Club Rates, nor can they be taken as premiums. Price per 100 will be given on application.

TREES BY MAIL—We have a choice lot of small one-year-old trees suitable for mailing to our customers in distant States, thus saving them heavy express charges. We know many will avail themselves of this opportunity of getting trees who could not otherwise do so.

.-·-.FERNS *Most Beautiful of All Decorative Plants* FERNS.-·-.

The New Fern

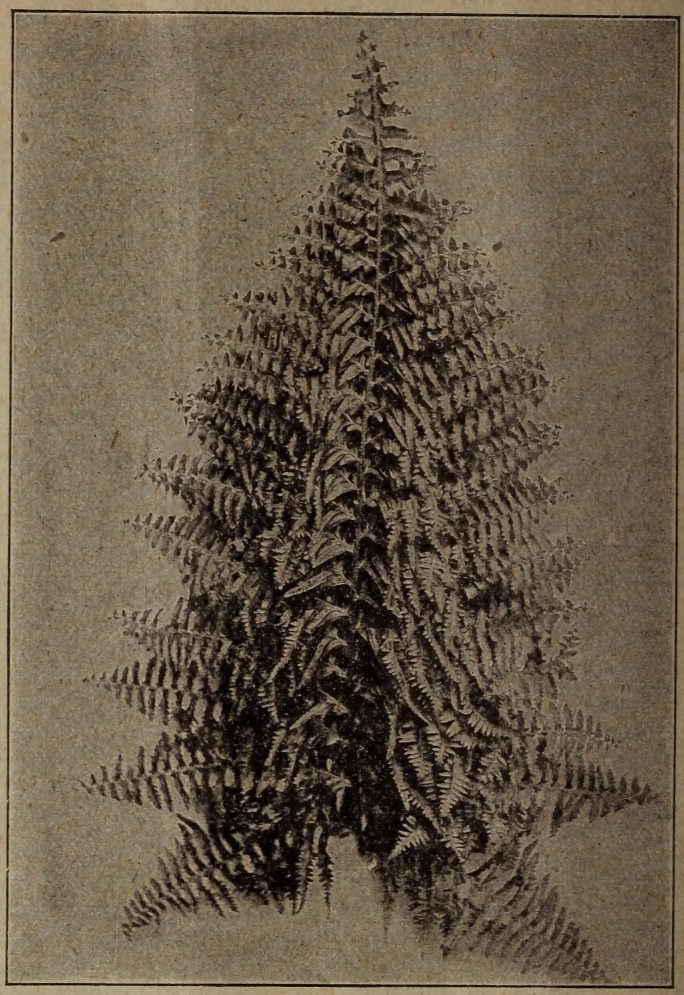
Nephrolepis Piersoni Elegantissima

This is a sport from the Pierson Fern, in which the plumy peculiarity of the original form is even more distinctly developed than in the original, the side pinnae being again subdivided and standing at right angles to the mid-rib, makes both sides of the frond equally beautiful, while, at the same time, the plant is of much more compact habit, growing only one-half as tall, but with the fronds nearly twice as wide. Taking it altogether, it makes one of the most exquisite plants and one of the most valuable for table and house decoration that has ever been introduced. The cut fronds, on account of their beauty, are in great demand for table decoration, design work, and for use in boxes of loose flowers. There is nothing in the Fern line that is so handsome as this beautiful Fern when well grown, well-grown plants making most magnificent specimens. It is an aristocrat among Ferns, and is destined to become one of the most popular. **Price, 40c each; three for $1.00.**

New Sword Fern

Nephrolepis Piersoni

This plant has received a gold medal on six different occasions at plant exhibitions and is conceded by everyone to be the Fern of the century. A sport from the well-known Boston Fern, differing from it in that the pinnae of the Boston Fern frond is subdivided into separate pinnae making each a perfect frond. It has a beautiful feathery appearance when a mature plant and is liable, in time, to entirely supplant the common Boston Fern as a decorative house plant. **Price, 20c each; fine, large specimen plants, 50c each.**



Frond of New Fern "Elegantissima."

Boston F

Adiantum Cuneatum

Maiden Hair Fern. A very beautiful and graceful Fern, its delicate fronds being much used for cut flower work. **Price, 15c each.**

Pteris Argyrea

Silver Fern. A very showy Fern, with variegated foliage, fronds large, light green, with a broad band of silver-white down the center of each. Very distinct. **Price, 15c each; large size, 35c.**

Pteris Tremula, or Shaking Fern

One of the finest Ferns for house decoration, growing very rapidly, and throwing up large, handsome fronds. It makes magnificent specimens, easily grown and very popular. **Price, 15c each; larger size, 35c.**

The Popular Boston Sword Fern, Nephrolepis Exaltata Bostoniensis

In the vicinity of Boston no other plant is used so extensively as this graceful Nephrolepis, which differs from the ordinary Fern in having much longer fronds, which frequently attain a length of four feet. These fronds arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern. This drooping habit makes it an excellent plant to grow as a single specimen on a table or pedestal. **Price, nice plants, 10c each; larger size, 50c each.**
